

New Features Update - October 2018
V16.04 (Windows) and V16.0.4 (Macintosh)

1. _____

Updated Login window for Kurzweil 3000 for Mac (Web License Subscription Only).

Same login, new look!

2. _____

Filter Universal Library folders by name in Kurzweil 3000 for Windows.

In large subscriptions, it can be time consuming to find a particular user's folder. For subscriptions with over 1,000 licenses, you can search the top level list of user folders by last name to quickly locate a student or teacher folder.

In smaller subscriptions of less than 1,000 licenses, the field filters by folder name.

- Go to the Universal Library to Open or Save a file
- Start typing the filter criteria in the **Filter folders by last name** or **Filter folders by name** field.
- The list of folders will be filtered by that criteria.

1000+ licenses

Less than 1000 licenses

3.

Drag and Drop files to Copy or Move in the Universal Library in Kurzweil 3000 for Web Browsers (Kurzweil3000.com).

Move a File

- Drag and drop the file from one folder to another.

Copy a File

- In a *Windows internet browser*, press and hold the **Ctrl key** on the keyboard while you drag and drop your file.
- In a *Mac internet browser*, press and hold the **Option key** on the keyboard while you drag and drop your file.

Note: Remember to *let go of the mouse button first*, before the keyboard button when copying.

4.

Add an Image Caption to a Bubble Note in Kurzweil 3000 for Web Browsers (Kurzweil3000.com).

When adding an image to a bubble note, add a text caption in the Image Caption field. The text will read when the bubble note is read, but will not show on the screen.

The screenshot shows the configuration interface for a bubble note in Kurzweil 3000. At the top, there are dropdown menus for 'Shape' (set to 'Balloon') and 'Size' (set to 'Small'). Below these is a preview window titled 'Add a Text Caption to an Image' which contains a small image of a cube and a large empty text area. To the right of the preview are two main sections: 'Open Options' and 'Question Options'. The 'Open Options' section has a checked radio button for 'Open while reading' and three unchecked options: 'Open before unit is read', 'Open when word is read', and 'Open after unit is read'. The 'Question Options' section has a checked radio button for 'No question' and several other options: 'True or False', 'Multiple Choice Question' (with '+' and '-' buttons), 'Radio Button', 'Checkbox', 'Match', 'Text Answer', 'One line', and 'Multi-line'. Below these is the 'Question Image' section, which includes a 'Select File' button and an 'Image Size' section with input fields for 'Width: 100 px' and 'Height: 99 px'. A text input field below the size fields contains the text 'Think Outside the Box!' and is circled in red. Below the text field is a 'Set Image Properties' button. At the bottom of the interface are four buttons: 'Clear Answer', 'Delete Bubble Note', 'Cancel', and 'Save'.

5. Menu and button changes in Kurzweil 3000 for Web Browsers (Kurzweil3000.com).

Buttons have been added to the Highlighter, Notes and Tools menus, and the Column Notes button has been added to the top toolbar (see item 8).

Edit Underlying Text

Note: These buttons were removed from the top toolbar.

6. Re-Recognize Page and resolve Underlying Text Conflicts in Kurzweil 3000 for Web Browsers (Kurzweil3000.com).

Occasionally you need to re-recognize a page in a document. This is like rescanning the page with the OCR engine. It will remove any zone changes you have made and look for any conflicts with the existing underlying text.

- Go to the page you want to re-recognize
- Choose **Tools menu > Zone Edit....**
- Click the Re-Recognize tab and click the **Re-Recognize Page button**.

A prompt will remind you that any zone edits will be lost. Click Yes to re-recognize the page.

Any previous changes to the Underlying Text that conflict with the newly recognized text, will appear in the **Underlying Text Conflict window**.

Use Original - the underlying text that was present before the re-recognize.

Use New - the underlying text as the re-recognize sees it.

Use Other - enter your own word to be read.

Restore All Original Words - keep all underlying text as it was before the re-recognize.

Keep All New Words - keep all underlying text as the re-recognize sees them.

The option to Save will appear when all word conflicts are resolved.

7. Edit Overridden OCR zone text in Edit Underlying Text window in Kurzweil 3000 for Web Browsers (Kurzweil3000.com).

If you have text overriding a zone, you can edit that text while in the Edit Underlying Text window.

Delete a Zone

- Select a zone and click the **Delete Zone** button.
- Or click the **Delete All Zones** button to remove all zones from the file.

Change the Zone Type

- Click a zone to select it and choose:

Primary (yellow) - text that reads in the order specified

Secondary (green) - text that reads only when you choose to hear it by placing your cursor and clicking the Read button

Graphic (blue) - a zone that is not read

Note: The zone will change color to reflect the type of zone selected.

Override the Text in the Zone

- Add text to a zone that is not reading correctly or does not have text. This can be useful for describing a graphic or math problem.

Change the Reading Order of a Zone

- Click the zone to select it and type the number of when you would like the zone read relative to the other zones.

Different Zone Types

Change the Zone Type Click a zone to select it and choose:

Primary (yellow) - text that reads in the order specified Secondary (green) - text that reads only when you choose to hear it placing your cursor and clicking the Read button Graphic (blue) - a zone that is not read Note: The zone will color to reflect the of zone selected.

Override the Text in the Zone

- Add text to a zone that is not reading correctly or does not have text.

Extract Highlights to Column Notes

Highlight your document with different highlighters and extract them into a column notes file.

The dialog box 'Extract Highlights To Column Notes' shows the following settings:

- Yellow Highlighter: 1
- Green Highlighter: 2
- Blue Highlighter: 3
- Pink Highlighter: 1
- Orange Highlighter: 2
- Gray Highlighter: 3
- Red Circle: 1
- Blue Circle: 2

The resulting table is as follows:

Main Ideas	Supporting Ideas	Other
huge amounts of gasoline	870 million gallons of gasoline	
	United States alone,	380 million gallons,

Extract Column Notes to Outline

If you have a writing assignment based on the reading you can then extract those notes into an Outline file to start writing.

Extract Highlights to Vocabulary Study Guide

Highlight specific words in your document and extract them into a study guide. Definitions will automatically appear in the Definition 1 & 2 columns.

The dialog box 'Extract Highlights To Vocabulary Study Guide' shows the following settings:

- Yellow Highlighter:
- Green Highlighter:
- Blue Highlighter:
- Pink Highlighter:
- Orange Highlighter:
- Gray Highlighter:
- Red Circle:
- Blue Circle:

The 'Select Dictionary' dropdown is set to 'American Heritage Fifth Edition'.

The resulting table is as follows:

Vocabulary	Definition 1	Definition 2
Ethanol	ethanol. noun.	Origin: ethan(e) + -ol
alternative	alternative. noun. One of a number of possible choices or courses of action: There are plenty of	alternative. adjective. Being one of a number of possible choices or courses of action: The

Customize Highlighter/Extract Options

The options for customizing how highlights are extracted has been updated to include options for column notes.

9.
